Amendments to the Claims:

- 1-21 (Canceled)
- 22. (Currently amended) A process for the preparation of 5-carboxyphthalide of formula A

which comprises reacting formaldehyde and terephthalic acid of formula I

in fuming sulfuric acid containing at least $\frac{20\%}{25-30\%}$ by weight of SO₃, heating the mixture at 120-145°C and isolating the 5-carboxyphthalide thus obtained.

23. (Original) A process according to claim 22, in which formaldehyde is used in form of its precursor 1,3,5-trioxane of formula II

- 24. (Original) A process according to claim 22, in which formaldehyde is used in form of its precursor paraformaldehyde.
- 25. (Original) A process according to claim 23, in which the 1,3,5-trioxane of formula II is used in an amount corresponding to 2.5-3.2 mol of formaldehyde/mol of the starting terephthalic acid.
- 26. (Original) A process according to claim 25, in which said 1,3,5-trioxane is added at a temperature of 30-35°C.
- 27. (Cancelled)
- 28. (Currently amended) A process according to claim 27 22, in which the fuming sulfuric acid is used in an amount of 3-6 litres/Kg of terephthalic acid.

- 29. (Original) A process according to claim 28, in which furning sulfuric acid is used in an amount of about 3 litres/Kg of terephthalic acid.
- 30. (Original) A process according to claim 22, in which 5-carboxyphthalide is isolated by neutralization of the reaction mixture with a base.
- 31. (Original) A process according to claim 22, in which 5-carboxyphthalide is isolated by diluting the reaction mixture with glacial acetic acid, then adding water and neutralizing with a base.
- 32. (Original) A process according to claim 30 or 31, in which said base is an alkaline metal base.
- 33. (Original) A process according to claim 32, in which said alkaline metal base is sodium hydroxide, carbonate or bicarbonate.
- 34. (Original) A process according to claim 22, in which, at the end of the reaction, the 5-carboxyphthalide is isolated by the formation of a solution containing a salt thereof which is neutralized with an acid.
- 35. (Original) A process according to claim 34, in which said salt is the sodium salt.
- 36. (Original) A process according to claim 34, in which the salt is formed by adding the base to a pH of about 8.
- 37. (Original) A process according to claim 34, in which said acid is hydrochloric acid.
- 38. (Original) A process according to claim 22, in which 5-carboxyphthalide is isolated by treatment of the reaction mixture with water.
- 39. (Original) A process according to claim 38, in which the addition of water is made at 0-5°C and the exothermia is controlled by keeping the temperature at about 20-25°C.
- 40. (Original) A process according to claim 22, in which the mixture is heated at 130-135°C.
- 41. (Original) A process according to claim 22, in which formaldehyde is added to fuming sulfuric acid after the addition of terephthalic acid.
- 42. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 22.

- 43. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 23.
- 44. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 24.
- 45. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 25.
- 46. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 26.
- 47. (Canceled)

Ā

- 48. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 28.
- 49. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 29.
- 50. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 30.
- 51. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 31.
- 52. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 32.
- 53. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 33.
- 54. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 34.
- 55. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 35.
- 56. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 36.
- 57. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 37.

- 58. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 38.
- 59. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 39.
- 60. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 40.

1

61. (Original) A process for the synthesis of citalopram, comprising the process for the synthesis of 5-carboxyphthalide according to claim 41.
